

## 10 EJERCICIOS PYTHON NOVATO EN CODEDÉX

No conseguí medalla (no entiendo como se consiguen). Complete todos los 4 niveles gratuitos, son alrededor de 22 ejercicios

The screenshot shows the Python course interface on Codecademy. The top banner features a jungle-themed illustration with a large snake and a dinosaur. The word "Python" is prominently displayed in a pixelated font. Below it, a description states: "Learn programming fundamentals such as variables, control flow, and loops with the world's most popular and versatile coding language — Python!". A yellow "Resume Learning" button is positioned below the text.

The main content area is divided into two sections. On the left, a vertical list of course topics is shown, each with a green checkmark icon indicating completion: "Hello World", "Variables", "Control Flow", "Loops", "Checkpoint Project", "Lists", and "Functions". To the right of this list, a sidebar displays the user's profile and progress. The profile section shows the username "vale07" at "Level 3" with a "View Profile" button. The "Course Progress" section includes three progress bars: "Exercises" (21 / 43), "Projects Completed" (0 / 2), and "XP Earned" (305 / 685). The "Course Badges" section shows 4 / 8 badges earned, with a note: "Complete a chapter to earn a badge — collect 'em all!".

Topic	Status	Club
Hello World	Completed	
Variables	Completed	
Control Flow	Completed	
Loops	Completed	
Checkpoint Project	In Progress	Club
Lists	In Progress	Club
Functions	In Progress	Club

Category	Progress
Exercises	21 / 43
Projects Completed	0 / 2
XP Earned	305 / 685

Badge	Count
Course Badges	4 / 8
